

Energy Audits

People's Energy Cooperative offers energy audit services to both residential and business members at a reduced cost. Energy audits are performed by trained professionals who help identify where a home, building, or facility uses energy and how that energy may be used more efficiently.

When an approved audit is performed and recommended improvements are implemented, members may qualify for an "Audit Recommended Improvements" rebate of up to \$500 or "Cost of Audit" rebate of up to \$200. Other prescriptive rebates may also apply.

Everyone | Everyday | Everywhere | Everything

Since 1998, Evergreen has been an easy and affordable way for residential and business members of the Cooperative to support the development of solar installations. For as little as \$0.65 per month, members can subscribe to the program and offset their energy usage up to 100%.

Commercial, Industrial, & Agriculture Energy Management Programs

Commercial, industrial, and agriculture members, with higher energy demand, may benefit from our peak demand programs. Participants also benefit from a reduced energy rate.

Peak Alert Interruptible Rate

When a Maximum Generation or Regional Capacity Event is declared, members on the Peak Alert Interruptible rate will automatically have their generator turned on for the duration of the event.

Controllable Seasonable Rate

When a Peak Energy Alert is issued, members on the Controllable Seasonable rate voluntarily shed their electric load or delay electric use for the duration of the event.

To learn more about either program, visit www.peoplesenergy.coop/commercial-industrial-agricultural-programs.

Programs and rates are subject to change. Some restrictions apply.

Visit us online or call us to learn more about our programs and services at (800) 214-2694!

Your Touchstone Energy® Cooperative

www.peoplesenergy.coop

When the ENERGY is ELECTRIC...

SAFETY COMES FIRST

Electric appliances are generally safer than gas appliances as they pose no threat of carbon monoxide poisoning, combustion, or explosion.

YOU'LL SAVE MONEY

Electric HVAC equipment can be less expensive throughout total ownership when enrolled in an energy management program.

EVERYONE BENEFITS

Smart appliances and homes can work together to balance load on a clean energy grid.

IT'S EFFICIENT & SUSTAINABLE

New electric appliances, power tools, and vehicles are more efficient and are better for the planet. Plus, you'll never have to worry about running out of gas when you're in the middle of a project!

programs@peoplesenergy.coop

What is Beneficial Electrification and Energy Management?

Beneficial electrification includes innovations in energy technologies that aim to use electricity instead of on-site fossil fuels, such as propane, natural gas, and fuel oil, in a way that reduces overall emissions and energy costs, and leads to a more resilient grid.

Energy management is energy conservation at work designed to save you money. It's a partnership between a utility and a consumer to reduce the amount of electricity used during times of high demand and higher energy prices.

Both work together to benefit both you, the member, and the Cooperative.

Energize Your Drive

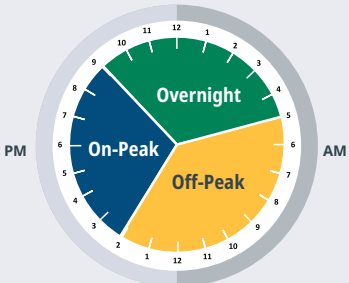

Electric vehicles are an important part of the transportation landscape and we offer member incentive rates and rebates for electric vehicle charging. We also sell EV chargers with integrated metering systems! Rebates of up to \$800 and special incentive rates encourage charging during non-peak energy times.

EV Charging Subscription Rate

Our subscription rate is convenient and incentivizes overnight charging, allowing members to charge as much as they need (up to 800 kWh) during overnight time periods for a flat charge of \$30 per month. Charging during other time periods is still available, but it will result in additional cost.

Monthly Subscription Charge: \$30

Overnight: 9 pm - 5 am
<800 kWh - \$0.00/kWh
>800 kWh - \$0.04950/kWh

Off-Peak: 5 am - 2 pm
\$0.0850/kWh

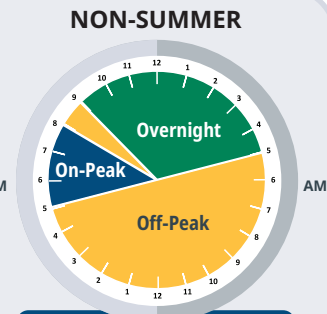

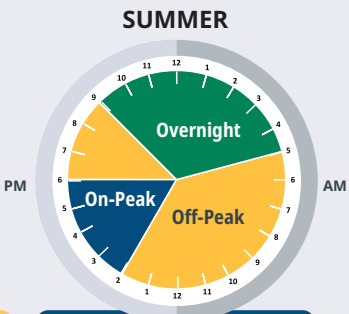

On-Peak: 2 pm - 9 pm
\$0.26050/kWh

EV Charging Time-of-Use Rate

Our EV Time-of-Use rate gives members the flexibility to charge when it is most convenient and cost-effective for them. However, overnight charging rates are dramatically reduced compared to charging during the peak demand period.

Monthly Basic Service Charge:

Single Phase - \$7.00
Three Phase - \$11.00

Overnight: 9 pm - 5 am
\$0.04950/kWh

Off-Peak: All other hours
\$0.08500/kWh

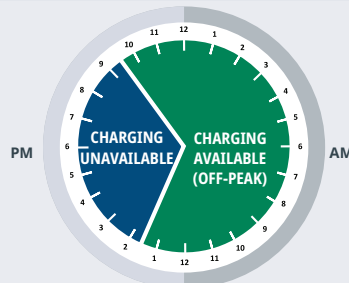

On-Peak: 2 pm - 6 pm
\$0.26050/kWh

On-Peak: 5 pm - 8 pm
\$0.26050/kWh

EV Charging Off-Peak Rate

EV charging is best when it is done at night and during off-peak hours. Our EV Off-Peak incentivizes charging at night with a significantly reduced rate. The trade-off is that you can only charge your vehicle during off-peak hours.

Monthly Basic Service Charge: \$7.00

Available (Off-Peak):
9:30 pm - 1:30 pm
M-F, all hours on weekends and holidays.
\$0.062/kWh

Unavailable: 1:30 pm - 9:30 pm
M-F, excluding holidays.

Water Heater Program

By installing an electric water heater when building or making improvements to a home, members can take advantage of multiple benefits at the Cooperative. Through our water heater program, members have the freedom to pick the brand of water heater they desire along with the installer of their choice.

Valuable rebates range from \$250 to \$500 and are available for a variety of water heaters.

When a member participates in either the Dual Fuel Energy Management or Off-Peak Energy Management programs, the Cooperative saves money on wholesale power costs and the member is eligible to receive a discounted electric rate.

Members enrolled in our **Water Heater Energy Management Program** are also eligible to receive a one-time service/repair voucher up to \$100 in a 12-month period, and up to three (3) times over the lifetime of the water heater. Visit www.peoplesenergy.coop/water-heating-programs to learn more.

Electric Heat Programs

Heating and cooling use the largest chunk of your home energy dollars. When you choose electric, you know it's clean, reliable, safe, and very energy efficient.

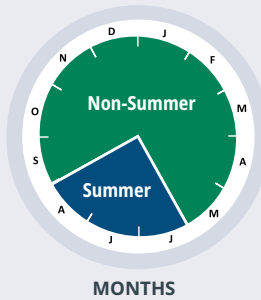

Our programs reduce peak demand, save participating members and the Cooperative money, and conserve electricity!

Dual Fuel

Dual Fuel is an energy management program available to members who choose to install heating systems with a combination of a primary electric and a secondary propane or natural gas source. The secondary system must be able to automatically provide 100% of the home's heating needs during a peak energy event.

Monthly Basic Service Charge: \$7.00

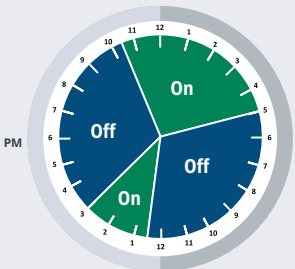

Non-Summer Season: Sept-May,
events generally occur
7:00 am - 11:00 am.
\$0.0751/kWh

Summer Season: June-August,
events generally occur
2:00 pm - 6:00 pm.
\$0.10850/kWh

Off-Peak

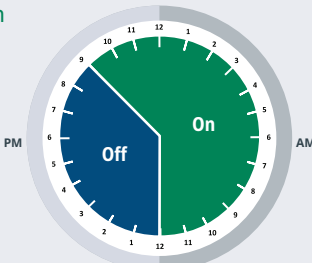

Off-Peak is an energy management program available to members who choose to install electric space heating or electric water heating loads of at least 8kW. Eligible items are turned off up to 14 hours each day.

Monthly Basic Service Charge: \$7.00
Energy Charge: \$0.06200/kWh

Non-Summer (November - April)
Control Hours: 5 am - 12:30 pm
(max of 6.5 hours)
Control Hours: 3 pm - 10:30 pm
(max of 6.5 hours)

Summer (May - October)
Control Hours: 12 pm - 9 pm
(max of 8 hours)

NON-SUMMER

SUMMER

APPLIANCES

Clothes Dryer – Electric	Must be ENERGY STAR	\$25	each
Clothes Washer	Must be ENERGY STAR	\$25	each
All-in-One Washer/Dryer Combo	Must be ENERGY STAR; Must use ventless heat pump drying	\$50	each
Dehumidifier	Must be ENERGY STAR	\$25	each
Dishwasher	Must be ENERGY STAR	\$25	each
Refrigerator	Must be ENERGY STAR and ≥ 10 cubic ft.	\$25	each
Freezer	Must be ENERGY STAR and ≥ 10 cubic ft.	\$25	each
Inductive Range	All inductive ranges qualify	\$25	each
Recycling - Freezer	Must be working appliance	\$25	each
Recycling - Refrigerator	Must be working appliance	\$25	each
Recycling - Room Air Conditioner	Must be working appliance	\$25	each

AUDIT/ASSESSMENT

Compressed Air Audit	\$500 cap	varies	each
Energy Audit Cost	50% of the audit cost up to \$200	varies	each
Energy Audit Implemented Recommendation(s)	\$500 cap; exclusions may apply	varies	each

HEATING & COOLING

Heat Pump - Air Source & Mini-Split	SEER2 14.3+, HSPF2 7.5+ <u>OR</u> SEER 15+, HSPF 8.8+	\$200	per ton
Heat Pump - Commercial Air Source & PTHPs	< 20 ton: EER 11+; 20 to 59 ton: EER 10.5+; ≥ 60 ton: EER 10+	\$200	per ton
Heat Pump - Geothermal		\$400	per ton
New Furnace with ECM Blower Motor	Must be variable speed motor <u>OR</u> Eae < 670 kWh/yr.; Must be installed on primary heat source	\$35	each
Air Conditioner Tune-Up	Only one per service address per year and must be completed by certified technician; Window units are not eligible	\$25	each
Smart Thermostat	Honeywell or Emerson brand thermostat; Must enroll in energy management program	\$25	each

LIGHTING

LED Bulb (Screw-In)	Five bulb minimum; Rebate not to exceed 50% of equipment cost	\$0.50	each
LED Fixture	Rebate not to exceed 50% of equipment cost	\$0.50	per 800 lumens
LED Exit Sign	Rebate not to exceed 50% of equipment cost	\$5	each
Occupancy Sensor	Doesn't include exterior motion detector fixtures; Rebate not to exceed 50% of equipment cost	\$5	each

COMMERCIAL/INDUSTRIAL/AGRICULTURE

Exhaust Fan	Fans < 36" must be ≥ 18 cfm/watt @ 0.05" SP Fans ≥ 36 " must be ≥ 21 cfm/watt @ 0.05" SP	\$1	per inch diam.
Circulation Fan	Fans < 36" must be ≥ 18 lbs. force/kW Fans ≥ 36 " must be ≥ 21 lbs. force/kW	\$1	per inch diam.
Electric Forklift Battery Charger	Must enroll in energy management program	\$200	each
Dairy Plate Cooler / Well Water Pre-Cooler		\$500	each

2026 Rebate Summary *cont.*

COMMERCIAL/INDUSTRIAL/AGRICULTURE CONTINUED

Dairy Refrigeration Heat Recovery with Electric Backup	Requires electric water heater enrolled in energy management program	\$300	each
Low/Zero Energy Livestock Waterer	≤ 500 watts, insulated tank	\$50	each
Scroll Refrigeration Compressor	\$1,000 cap per compressor	\$30	per HP
Variable Frequency Drive (VFD)	\$1,000 cap per drive	\$30	per HP

WATER HEATING

Heat Pump Water Heater	Integrated (all-in-one) units, ≥ UEF	\$500	each
Electric Water Heater (75 – 99 Gallons)	≥.90 UEF; must enroll in energy management program; see rebate form to determine eligibility	\$250	each
Electric Water Heater (100+ Gallons)	≥.90 UEF; must enroll in energy management program; see rebate form to determine eligibility	\$400	each

ELECTRIC\$ENSE NEW HOME PROGRAM

New Home	Must meet 1 of 3 program/code requirements	\$500	each
----------	--	-------	------

ELECTRIC VEHICLES

Electric Vehicle Charging Station	Must enroll in energy management program or Time-of-Use rate	\$500	each
Electric Vehicle Charging Station Installation Costs	Only for installation costs of secondary meter with regular EV charger	\$200	each
Electric Vehicle Smart Charger with Integrated Metering (purchased from Cooperative)	Must enroll in energy management program or Time-of-Use rate	\$1,000	each

SOLAR\$ENSE: MEMBER-OWNED SOLAR

Solar System - South Facing	Produces < 120% of annual energy use; \$2,000 max per location; azimuth angle 135-224 degrees	\$0.25	watt
Solar System - West Facing	Produces < 120% of annual energy use; \$4,000 max per location; azimuth angle 225-270 degrees	\$0.50	watt

IMPORTANT REBATE GUIDELINES

- Rebate requestor must be a member of the Cooperative.
- Equipment must be installed on the Cooperative's lines.
- Incentives will not exceed the cost of the equipment.
- Rebates must be submitted within three months of purchase or install date depending on measure.
- Prescriptive rebates are capped at \$20,000 per member account and custom rebates are capped at \$12,000 per member account.
- All appropriate documentation must be submitted per the rebate form.
- Eligibility criteria may vary for individual rebate offerings and is subject to change or cancellation without notice. View individual forms for additional details.

Learn more about our member programs and rebates at www.peoplesenergy.coop.
